

Full Stack Developer (m/f/d)

Standort Berlin, Dresden - ab sofort in Full- or part-time (min. 30 h)

We are aifinyo - a fintech from Berlin and Dresden. We simplify the financial processes of start-ups, self-employed people and companies with our smart digital solutions. Because we believe that they are what drives our company forward. With our web-based tools, our customers manage their finances, invoices and accounting from anywhere.

Our team is our strength. Always at eye level and open and honest with each other - this is how we surpass ourselves every day. With us, everyone can realise their potential, quickly take on responsibility and actively help shape the future of the company.

Was dich bei uns erwartet

Das wirst du bei uns machen

- You will be **responsible for the development and maintenance** of our applications and services using node.js, nest.js, React.js and TypeScript.
- You will actively participate in the **entire development lifecycle**, from conception to deployment and maintenance.
- Your focus will include **ensuring code quality, performing tests and fixing bugs**.
- Building on this, you will continuously **improve the existing code base** and identify **opportunities to optimise** performance and usability.

- Together with your colleagues from the development team, you tackle technical challenges and find **innovative solutions**.

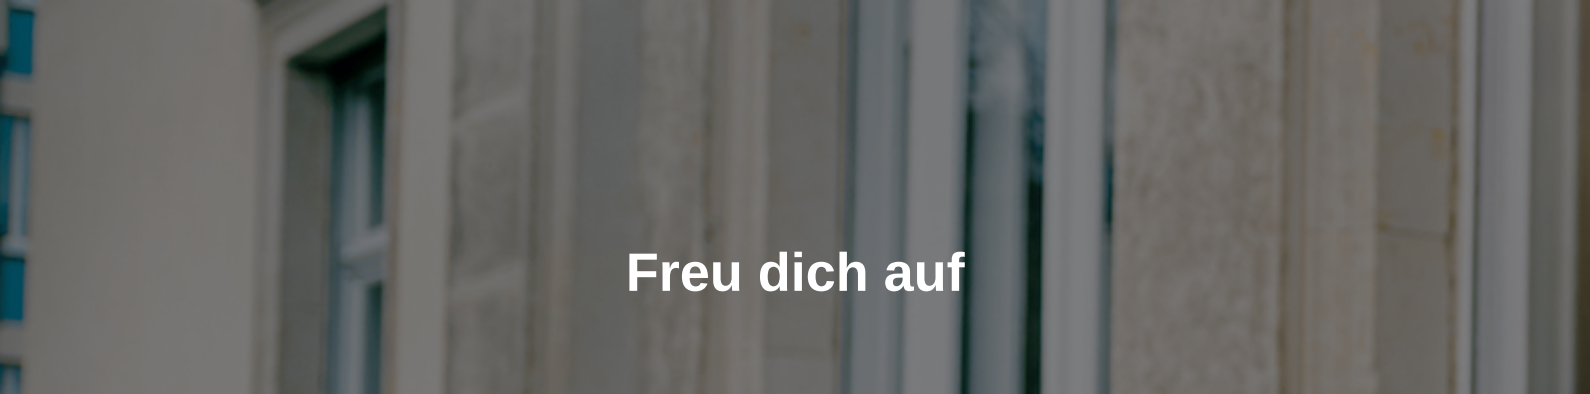

Weitere Informationen

Our TechStack

- Our services implement **REST and GraphQL APIs** and we build them with **NestJS and TypeScript**.
- Some systems run on **PHP, Go, Ruby, and Python**, so experience with these technologies would be a strong advantage.
- The infrastructure is on **AWS, Kubernetes** and we also use **GitHub Actions (CI/CD)**.
- For quality control, we have several **PR review processes** and place a high value on adequate **test coverage**.
- For **API documentation** and **test monitoring**, we use **Postman**.

Das bringst du mit

- You have **at least two years** of professional **experience as a full-stack developer** especially in **TypeScript and Nest.js**.
- **Experience in developing web-based applications** using modern development tools and frameworks, including the **integration of APIs** and **work with databases**.
- Solid **understanding of UI/UX principles** combined with hands-on experience in **implementing responsive designs**.
- Strong **analytical skills** with the ability to **identify complex problems** and **develop effective solutions**.
- Strong **communication and teamwork** skills as well as **professional English skills** and **good German skills** complete your profile.
